RESEARCH	<p>My current research spans causal inference, statistical learning, and optimization. I am working on regression discontinuity designs with Guido Imbens and Stefan Wager, and robust causal inference with Dominik Rothenhäusler. I am also interested in reinforcement learning, generative AI, nonparametric statistics, random graphs, random matrices and their applications in statistics.</p> <ol style="list-style-type: none"> <li><b>Ghosh, A.</b>, Deb, N., Karmakar, B., &amp; Sen, B.
